

FIT3080 Assignment 1 – Marking Rubric

- **Use AI carefully.** When we read your Q&A contribution, we want to understand what you discovered and learnt, and how your design choices are motivated. Follow the AI guidelines on the assignment submission page.

Category	Marking Criteria	Marks Available
1. Code - Performance in Q1a	Marks will be proportional to the performance of your algorithm relative to the benchmark algorithm, as outlined in the assignment specification.	5
2. Code - Performance in Q1b	Marks will be proportional to the performance of your algorithm relative to the benchmark algorithm, as outlined in the assignment specification.	19
3. Code - Performance in Q2	Marks will be proportional to the performance of your algorithm relative to the benchmark algorithm, as outlined in the assignment specification.	24
4. Q&A	Clear, well-justified explanations for design choices and demonstration of a strong understanding of the selected approach in the context of the concepts taught in the unit. Accurate interpretation of results, and meaningful insights. Identification of meaningful limitations and proposal of realistic, well-reasoned improvements or alternatives.	16
